

HEAD & NECK FLEXIBLE

REF: H+N-S-N-002 & H+N-S-A-003+004

RIGHT INTERNAL CAROTID ARTERY MODEL WITH ONE ANEURYSM

Right internal carotid artery model with no aneurysms.

ELASTRAT in vitro models respect human anatomy and are designed for the development and demonstration of stents, coils and catheters. They provide a realistic environment for the simulation of endovascular procedures, pre-surgery training, studies and teaching purposes for interventionists.

Ref: H+N-S-A-003

Right internal carotid artery model with one aneurysm. Aneurysm \varnothing 11mm, length 13mm, \varnothing connecting artery 4mm.

Ref: H+N-S-A-004

Right internal carotid artery model with one aneurysm. Aneurysm \varnothing 10mm, length 14mm, neck 5.5 x 8mm.

ELASTRAT replicas are compatible with modern imaging modalities such as digital subtraction angiography, computed tomography and magnetic resonance imaging. Providing the use of an adequate circulating fluid, Doppler techniques can also be performed. The in vitro models transparency to light makes them suitable for video and photographic monitoring.
