

Thoracic model Ref: T-S-N-007+

If desired, this model is ready to work in a closed water circuit with a pump.

This model contains the aortic arch, the left ventricle and an exchangeable aortic valve

ELASTRAT in vitro models respect human anatomy and are designed for the development and demonstration of stents, coils and catheters. They provide a realistic environment for the simulation of endovascular procedures, pre-surgery training, studies and teaching purposes for interventionists.
