

Abdominal model Ref: A-S-A-020+ medium-large aneurysm

If desired, this model is ready to work in a closed water circuit with a pump.
Long-large neck model with a medium-large aneurysm (Similar model A-S-A-006+ shorter neck)

Internal dimensions of abdominal Model Ref: A-S-A-020 (lumen):

Elastrat in-vitro phantoms are compatible with modern imaging modalities such as digital subtraction angiography, computed tomography and magnetic resonance imaging. Providing the use of an adequate circulation fluid, Doppler techniques can also be performed. The training model's transparency to light makes them suitable for video and photographic monitoring.
