

RIGID Head and Neck palm model Ref: 101-3+

Arterio-venous palm model in rigid silicone with continuous flow pump

Ref 101-3+ Complete set ready to work in a closed water circuit.
Fill the box with water, always submerge the pump with water and your system runs.

Approx. external dimensions of rigid silicon bloc: 16.5cm x 13cm x 1.6cm

This model simulates part of an arterio-venous malformation and is particularly indicated for embolization trainings.
