

A 3 liter Plexiglas tank and small continuous flow aquarium pump

This pump and tank are used for one or two models. A 6 Lt tank also available for 3 models.

Pump and tank installed with water. (Aquarium pump always to be immersed in water!)

Tank specially developed with holes to hold the tubes and have the pump immersed in water.

Characteristics of this fully submersible, very quiet, low electrical consumption compact 1000 pump:

L/h : 150/1000

Gal/h : Imp. 33.220 US 40-265

H max m: 2,0 W: 23

This pump is a 220 W. We also have 110 W pumps available.

Details of 110- and 220-Volts aquarium continuous flow pumps:
